

JOURNAL OF INTELLIGENT MATERIAL SYSTEMS AND STRUCTURES

INSTRUCTIONS FOR AUTHORS SUBMITTING TO THE TOPICAL ISSUE OF JOURNAL FOCUSED on ENERGY HARVESTING

1. SUBMITTING PAPERS TO THE SPECIAL ISSUE OF THE JOURNAL: Electronic submission of the manuscript should be made to the journal website:

<http://mc.manuscriptcentral.com/jimss/jimss>

You may need to open an account and establish a username and password, if you have not done so already. During the submission process you will be asked to enter the contact information for the submitting authors, as well as all co-authors. Also, please indicate paper type as “SI – EH Workshop 2009”. Your guest editor will be Prof. Shashank Priya, and this should be indicated in your submission (there is a pulldown menu where you can select the preferred associate editor). For additional information, please contact the guest editor:

Prof. Shashank Priya, Ph.D.
Department of Mechanical Engineering
Virginia Tech
304A Holden Hall
Blacksburg, VA 24061
spriya@vt.edu
Office: (540) 231-0745

Revised manuscripts should also be resubmitted to the journal website. The revised manuscript should be resubmitted with an electronic version (WORD, or LATEX or equivalent). Also include a pdf file of the revised manuscript. Each figure or subfigure should be included as a captionless high resolution graphic file (tiff or eps or pdf) named using the naming convention as follows: figure1.tiff, figure2.tiff, figure 3a.tiff figure 3b.tiff etc. The suffix should reflect the file type (figure1.tiff, figure2.eps, figure3a.pdf, figure 3b.pdf etc.). The electronic versions are requested for the sole purpose of speeding production and improving the accuracy of the galley proofs produced by SAGE Publications.

2. Centered title should be brief, followed by centered name, affiliation, address, country, and postal code (zip) of author(s). Indicate to whom correspondence and proofs should be sent, including a telephone number, fax number and e-mail address. You will also be asked for a running head. This is simply a short title that would be printed on each page of the final typeset paper. This must be a short title of your paper.

3. ABSTRACT: Include a 100-word abstract.

4. KEYWORDS: Include a list of key words and author biographies

5. POTENTIAL REVIEWERS: A list of five potential reviewers should be submitted to the Editor at the time of manuscript submission through the editorial website.

6. ILLUSTRATIONS

—Computer generated graphics. Any art that is sent electronically should be in .tif files, in 300 dpi resolution, for superior reproduction. Colour original should be saved as greyscale images.

—Line Drawings. Originals should always be submitted. Wherever possible, graphs should be boxed in, and scale divisions should be marked on the inside of the boxes. Grids should not be shown. Insofar as possible, explanations should be placed in the legend. Original drawings should not be larger than 20x25 cm (8x10 in); if this is impossible, they must be accompanied by two sets of small photoprints. Measurements should be indicated in SI units.

—Lettering should be planned for 50% reduction; text must be readable after reduction.

—Photographs. Photographs should be supplied as glossy prints, and wherever possible, of the same size as they are to appear in the journal. Illustrations should be referred to as Figure 1, Figure 2, etc. The name(s) of the author(s) should be written on all illustrations, as should the Figure number. The indication “Top” must be given, if necessary. Besides the original illustrations, one duplicate set must accompany each copy of the manuscript; these copies may be photoprints, if clear and legible.

—Text must be readable after reduction.

7. JOURNAL AND BOOK REFERENCES should be identified in the text by author-date.

References, author-date, within text:

Last name of author and the year of publication of the work, separated by comma (Smith, 1798)

For works of multiple authorship use names for *two* or *three* authors:

(Clark and Lewis, 1989)

Clark and Lewis (1989)

(Byrnes, James, and Hoover, 1988)

Byrnes, James, and Hoover (1988)

In a reference to a work by two family members with the same last name, the name is repeated:

(Smith and Smith, 1980)

The plurals of the name may be used in the text when the reference is to the persons rather than the work:

The Smiths (1980) maintain that . . .

For more than three authors use the name of the first followed by “et al.”:

(Brown et al., 1960)

Brown et al. (1960)

Two or more references given together are separated by semicolons:
(Kim, 1983; Rogers and Liang, 1975; Wynne, 1977)

Several works by the same author are cited by date only and separated by commas; when page numbers are given, the references are separated by semi-colons and the name is repeated. References with the same author and year of publication should be distinguished in the text by appending a lowercase “a” to the year of publication of the first cited, a letter “b” to the second cited, and so on.

Rogers (1988a) discovered. . .
It was also noted (Rogers, 1988b) that. . .
(Brown, 1963a, 1963b, 1971)

Literature references should be listed alphabetically at the end of manuscript.

Author(s), date, “title of article,” title of publication, volume, page, etc.

Examples:

Bergman, L. A. and J. W. Nicholson. 1985. “Vibration of a Damped Combined Linear System,” *ASME Journal of Vibration, Acoustics, Stress, and Reliability in Design*, 107(3):275–281.

Black, J. R. 1980a. “Rotor Vibration of Ship Turbine Engines,” Ph.D. thesis, Imperial University, Washington, DC.

Black, J. R. 1980b. “A Second Publication by the Same Author and Year,” Hartwell Research Institute, Technical Report ST-91, Norfolk, VA. Choi, Y. et al. 1990. “A Publication with Multiple Authors,” *J. Intel. Mat. Syst. and Structures*, 1(1):91–104.

8. FIGURE, TABLE, EQUATION: spelled out in text, capitalized. Figure 1 Table 1 Equation (9)

9. TABLES. Number consecutively and type on a numbered, separate page.

Please use arabic numerals and supply a heading. Column headings should be explanatory and carry units (see example). Do not include vertical rules.

Table 1. Damage Location Accuracy

Test	Predicted Location (m)	Actual Location (m)	Error(%)
1	1.925	1.931	0.006
2	1.781	1.762	0.019
3	1.175	1.183	0.008

10. UNITS & ABBREVIATIONS. SI units should be used.

11. SYMBOLS. A list of symbols used and their meanings should be included if a large number of symbols appears in the text.

12. PROOFREADING AND OFFPRINTS. Authors will receive page proofs, which

they should correct and return as soon as possible. An offprint order form for purchase of additional offprints will be provided. No free offprints can be provided; the correspondence author will receive one free copy of the journal for each contributor.

13. COPYRIGHT INFORMATION. All original journal articles are copyrighted in the name of the publisher. All original articles accepted for publication must be accompanied by a signed copyright transfer agreement available from the journal editor or from the publisher's website. Previously copyrighted material may be published with the written permission of the copyright holder.

14. HEADINGS. Your article should be structured into sections. Normally two headings are used as follows:

Main Subhead: DESIGN OF A MICROWAVE INSTALLATION [all capital letters, centred]

Secondary Subhead: Principal of the Design Method [capitalize first letter of main words, left justified]

15. EQUATIONS. Number equations with arabic numbers enclosed in parentheses at the right-hand margin. Type superscripts and subscripts clearly above or below the baseline, or mark them with a caret. Be sure that all symbols, letters, and numbers are distinguishable (e.g., 0 for zero, one or lowercase "el", "vee" or Greek nu).

16. PERMISSIONS. The author is responsible for obtaining releases from other publishers for Sage Publications to publish material copyrighted by someone else.

GENERAL

Neither *Journal of Intelligent Material Systems and Structures*, nor the editorial board or the publisher is responsible for the views expressed by individual contributors in articles published in the Journal.
