HIGH FIDELITY WRAPAROUND

A Sustainable Model that Transforms Communities
THE WEB OF CONFUSION
Resilience is not just an intrinsic quality

“You can’t stop the waves but you can learn to surf”
– John Kabot Zinn

*It’s easier to learn to surf if you have a surfboard, a coach, and a lifeguard

Henrico SOC Team

FAPT

Wraparound Model / Family Partnership Meetings

Families
HENRICO’S STRENGTHS

- Positive working relationships – especially initially between the CSB and CSA

- New leadership stressing importance of collaboration and supporting the county’s mission

- Quantity of CSA staff. This allows for CSA staff to have closer involvement with cases to provide proactive service planning and more thorough utilization review. It also provides families and ICC teams with a direct FAPT resource.

- Open feedback loop with providers
Henrico Systems Of Care Team

Goal: To enhance and support community collaboration, training, and service development in order to strengthen and effectively serve children and families in Henrico County.
CORE PRINCIPLES

- Collaboration
- No wrong door
- Family Focused
- Individualized
- Community based

SYSTEM OF CARE

How do SOC Principles fit into the HFW model?
Key Components of High Fidelity Wrap Model

Engagement
- Individualized
- Community Based

Planning
- Family Voice and Choice
- Outcomes-Based

Transition
- Persistence

Implementation
- Team-Based
- Collaboration (and Integration)

Prioritized Needs
- Natural Supports
- Integrated Planning

Self-Efficacy
- Strength-Based
- Culturally Competent
- Natural Supports
When the High Fidelity Wraparound Model is implemented as intended there is ...

- A partnership between service providers and families.
- Teamwork coupled with flexible funding
- Services are family driven
- Services are individualized and strength-based
- Strengths, needs and cultural discovery are integrated into the service planning
Why Wraparound?

- Youth are more likely to be able to stay in their homes and communities.
- During a crisis, youth tend to be in out-of-home placements only for short periods of time.
- Youth have better outcomes than similar youth who don’t receive Wraparound.
- Saves money and you get more return on your treatment investment.
ACES can have lasting effects on:

- **Health** (obesity, diabetes, depression, suicide attempts, STDs, heart disease, cancer, stroke, COPD, broken bones)
- **Behaviors** (smoking, alcoholism, drug use)
- **Life Potential** (graduation rates, academic achievement, lost time from work)

ACEs have been found to have a graded dose-response relationship with 40+ outcomes to date.

But what about the people with a high ACES score that aren’t affected with poor health outcomes?
**The Adverse Childhood Experiences Study**

- Verbal abuse
- Physical abuse
- Sexual abuse
- Emotional Abuse
- Neglect
- DV
- Divorce/separation
- Caregiver mental illness
- Caregiver addiction
- Caregiver incarceration

**The Benevolent Childhood Experiences**

- Felt safe with a caregiver
- One good friend
- Positive school experience
- Caring teacher(s)
- Comforting beliefs
- Good neighbors
- Supportive adult other than caregiver
- Opportunities for fun
- Home routine
- Strong sense of self

Dr. Michael Unger and The Resilience Research Centre
Nine Things All Children Need

1. Structure
2. Consequences
3. Caregiver-child connections
4. LOTS of strong relationships
5. A powerful identity
6. A sense of control
7. A sense of belonging/culture/spirituality/life purpose
8. Rights and responsibilities
9. Safety and support
“We are a little bent... but not broken, just waiting on someone to help us.”
