This session will consist of three presentations and a discussion on the new DOE Wind Vision, the EPA Clean Power Plan, and policies that could help attain human health and environmental benefits by supporting clean renewables. We will discuss questions such as: Do the societal benefits of the DOE Wind Vision outweigh the costs, and if so how can that be reflected in effective public policy going forward? What role can wind play in the EPA Clean Power Plan? What roles can the Southeast play in the Wind Vision and in the Clean Power Plan?
